

Activity 1 Prompt Pack

Map an AI Use Case and Its Stakeholders

Use only the supplied mock data. Verify every AI-generated suggestion against the scenario and course framework. Never paste personal, confidential, assessment or client data into a public AI service.

Prompt 1

Act as an AI governance analyst. From the scenario, list the AI-assisted decision, intended users, affected people, benefits, foreseeable harms, and information gaps. Do not invent facts; label assumptions.

Prompt 2

Challenge the stakeholder map. Identify one stakeholder with high exposure but low decision power, and propose one safeguard and one feedback channel for that stakeholder.

Prompt-use checklist

Check	Required evidence
■	AI-assisted decision is explicit
■	Affected people are separate from users
■	Benefits and harms name who experiences them
■	Assumptions are labelled
■	Prohibited uses and owner are present
