

Activity 3 Prompt Pack

Tier AI Risk and Build a Governance RACI

Use only the supplied mock data. Verify every AI-generated suggestion against the scenario and course framework. Never paste personal, confidential, assessment or client data into a public AI service.

Prompt 1

Using severity, scale, reversibility, vulnerability and decision autonomy, recommend a risk tier for each use case. Explain each score and identify missing information.

Prompt 2

Create a RACI proposal for use-case approval, data approval, validation, deployment, monitoring, incident response and retirement. Ensure exactly one Accountable role per decision.

Prompt-use checklist

Check	Required evidence
■	Inventory is complete
■	Scores have reasons
■	Prohibited-use rule exists
■	One Accountable role per decision
■	Framework controls are crosswalked
