

Activity 5 Prompt Pack

Audit Fairness and Explainability

Use only the supplied mock data. Verify every AI-generated suggestion against the scenario and course framework. Never paste personal, confidential, assessment or client data into a public AI service.

Prompt 1

Review the group metrics as an AI fairness analyst. Distinguish observation from conclusion, identify the harmed pathway, and propose investigations before recommending a fix.

Prompt 2

Evaluate each explanation for fidelity, clarity, actionability and risk of misleading the affected person. Suggest a safer replacement notice.

Prompt-use checklist

Check	Required evidence
■	Confusion matrices reconcile
■	At least four metrics per group
■	Metric choice is justified
■	No causal claim from correlation
■	Explanation supports contestability
