

Activity 6 Prompt Pack

Design Data Governance and Privacy Controls

Use only the supplied mock data. Verify every AI-generated suggestion against the scenario and course framework. Never paste personal, confidential, assessment or client data into a public AI service.

Prompt 1

From the data inventory, identify purpose-limitation, consent, minimisation, quality, linkage, retention and access risks. Separate known facts from questions for the data owner.

Prompt 2

Recommend privacy-enhancing techniques only where they match the threat model. State the utility cost, residual risk and evidence needed to validate each technique.

Prompt-use checklist

Check	Required evidence
■	Purpose and authority recorded
■	Lineage reaches model decision
■	Quality measured by group
■	PET maps to threat
■	Derived copies included in deletion
