

Activity 8 Prompt Pack

Design Human Oversight and a Governance Decision

Use only the supplied mock data. Verify every AI-generated suggestion against the scenario and course framework. Never paste personal, confidential, assessment or client data into a public AI service.

Prompt 1

For each decision scenario, recommend human-in-the-loop, human-on-the-loop or human-out-of-the-loop. Use severity, reversibility, uncertainty, scale and vulnerable-person impact. Define reviewer authority and response time.

Prompt 2

Act as an AI governance council. Challenge the deployment proposal and write a go, conditional-go or no-go decision with evidence gaps, approval conditions, monitoring thresholds, incident triggers and a review date.

Prompt-use checklist

Check	Required evidence
■	Oversight choice is justified
■	Reviewer has time and authority
■	Escalation thresholds are measurable
■	Appeal and correction exist
■	Board decision records residual risk
